Antenna Mounting Guide

General Antenna Mounting Guidelines

The mounting bracket provided allows the antenna to be mounted in multiple orientations for best signal transmission and reception. Different orientations of the bracket on the antenna allows for upward and downward angles.

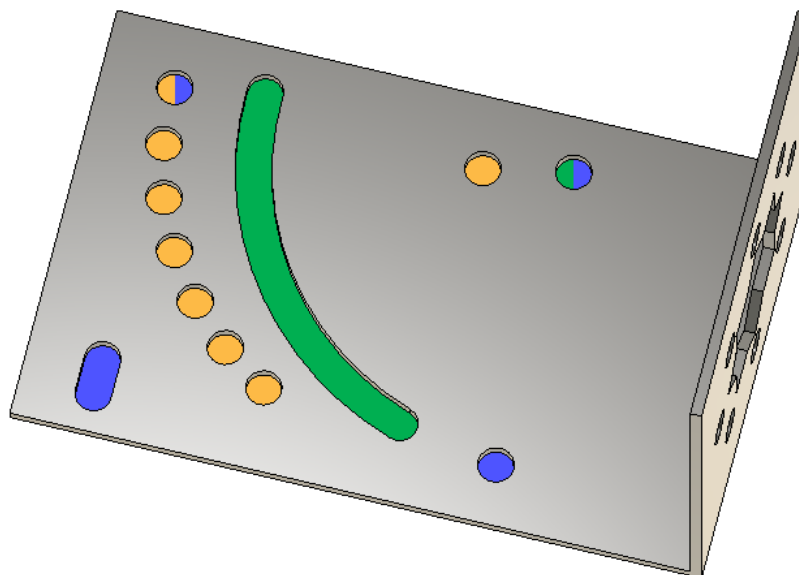

Note:

The mounting pole is not provided and is a standard item which can be purchased from DIY or specialist outlets

Guide to Hole Alignment and selection

Below is a key to the U Bolt position to achieve fixed or adjustable angles with a single U bolt and a straight mounting position with 2 U bolts.

-  Variable Angle Single U Bolt Position
-  Straight Mounting Double U Bolt Position
-  Fixed Angle Single U Bolt Position

Antenna Mounting Guide

Fixed Angle Mounting

Select the orange mounting holes and use 1 U bolt to fix the antenna to a 90° angled pole.

For different fixed angles select any of the orange holes on the arc.

Antenna Mounting Guide

Variable Angle Mounting

Select the green mounting holes and 1 U bolt to fix the antenna to a 90° angled pole.

For a different antenna angle, loosen the U bolt nut on the arc and move the antenna.
